

Viral RNA Lysis Buffer

Catalog Number: R145

Table 1. Product information

Cat No.	Product Name	Unit Size	Storage	Stability
R145	Viral RNA Lysis Buffer	100 mL	RT	The product is stable for 12 months when stored as directed.

Product Description

Viral RNA Lysis Buffer is intended for the isolation and purification of viral DNA/RNA from biological specimens for performance evaluation in vitro diagnostic procedures. It's compatible with commercially available RNA extraction kits comprising magnetic beads or spin columns, prior to RT-qPCR..

Viral RNA Lysis Buffer is designed for:

- ❖ Nasopharyngeal swab samples.
- ❖ Serum, plasma, urine, cell culture media, and other cell-free body fluids.
- ❖ Stabilization of nucleic acids with lysates.
- ❖ Nucleic acid purification using magnetic beads.
